

# **TIMESYS**

## **Statement**

A love letter to your own company. What is important to us and why are our employees the most powerful force in the company.

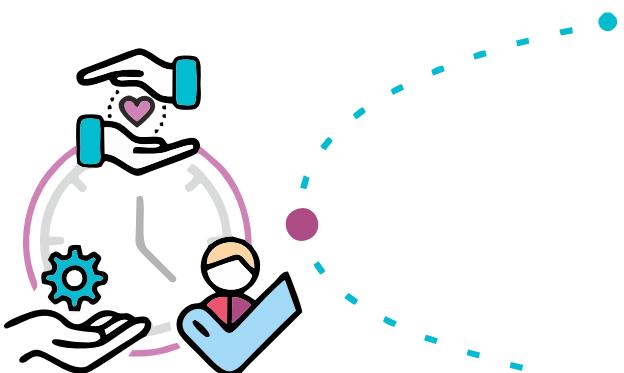

# TIMESYS Statement

## A declaration of love to the company

- by Petra Guschauski  
Senior Consultant, Customer Support

### TIMESYS ... what is it?

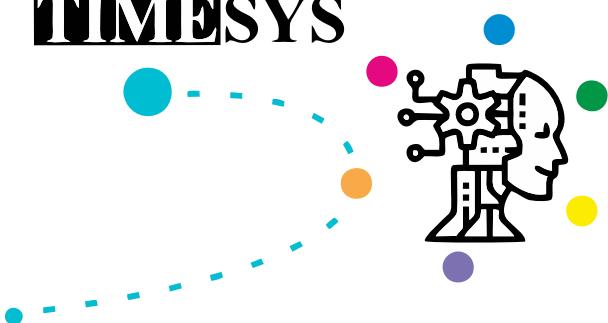

"We are now a **modern family company** with contemporary structures and a new, appealing and attractive external image. And yet: We market time recording - a product that **seems to have fallen out of time**, which may even come across as a bit "old-fashioned".

### What sets us apart?

We fall back on 38 years of experience. **Incredible 38 years!** Since 1983 we have faced new challenges together with our customers, which have been incorporated into the software over the years.

## TIMESYS

### Why are we doing this?

#### Because we believe in our product!

Because we have an ingenious interplay of our core products and modules 'time recording', 'access control', 'employee portal' and 'InfoService', which has now proven itself **for years**.

## We appreciate each other!

Our **long-term** employees with their different knowledge focuses and our customers from various industries have contributed to this. We have **inspired** each other again and again and have incorporated many developments of the last decades (your wishes and challenges) into our TIMENSION software.

## Cool? Maybe ... but definitely reliable!

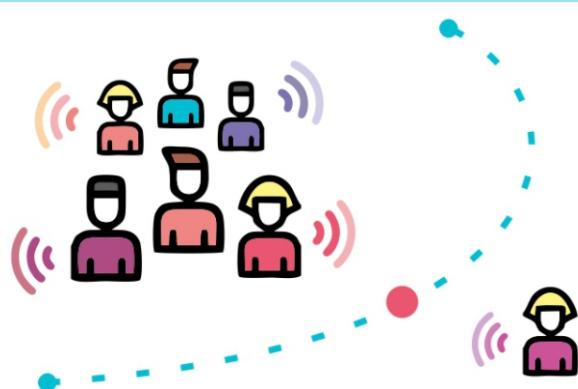

Our focus is maybe not on a cool design, but on a **functioning and reliable system** that moves with the times and never stops, but develops with us, our customers and interested parties.

## Our software is characterized by its reliability and stability.

Both simple and complex issues can be mapped without any problems. Our customers **find themselves in our application**, because we create the best possible, simplest and precisely tailored solutions for them.

## We can listen.

Both **small and large** companies can work with our software according to their requirements and include all areas of the company down to the **individual** employee.

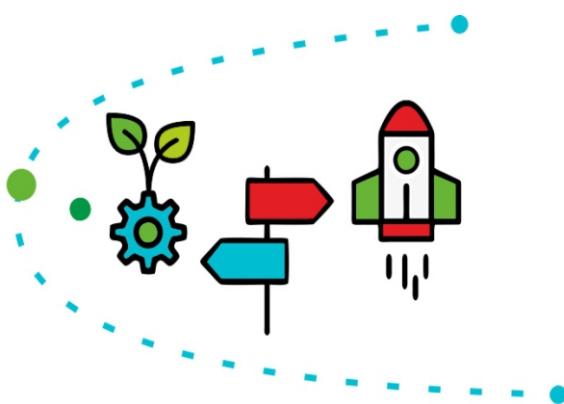

## The special tasks.

Particularly noteworthy are the numerous **evaluation options** that support controlling, enable the creation of operational key figures - and the **interaction of workflow and time recording**, which promotes decentralized work, relieves the HR department, and thus creates **trust** among superiors and employees.

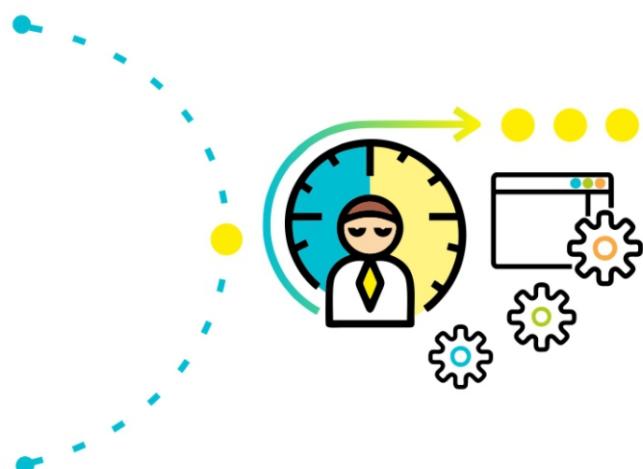

## Also very important for us - the self-sufficient work of our customers.

Which we enable not only to operate the system, but also to expand it independently. New working time regulations, new accounting regulations, individual user views, almost all master data can be set up by our customers **independently** and at **no additional cost**.

## You are the alpha and omega!

Therefore everyone can use the system as they like. We see this flexibility as **a big plus** for our customers, because customer **satisfaction** is not only the top priority, it is the **be-all and end-all** of our business relationships."

## Moving forward instead of chaining.

There is **no dependency** on TIMESYS as the provider. However, if support is required in this area, our support staff are **always available** to provide advice and assistance and are **happy** to relieve our customers of this work.

## You can always rely on our service.

Monday, Tuesday, Wednesday, Thursday, Friday and even on some weekends we have an open ear for you and your employees. Whether it is about database changes or updates, importing the calendar or internal training, new questions or questions that you have already asked and then ask yourself again: "**How was that actually?**"

This is exactly why our service is always on the spot for you and takes care of your orders **within the first 24 hours!** No long waiting times, because fast and transparent communication is a matter of course for us. What if it gets more complicated? Then we just talk to each other about it.

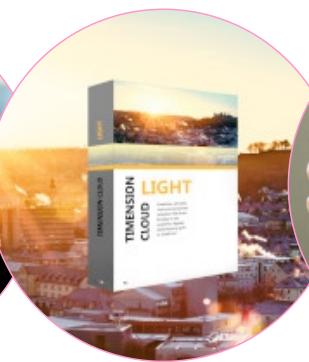

# More of that!

We are mobile!  
With our app, you  
can also flexibly  
record times  
while on the  
move.

The trainee news!  
Our two trainees  
present their  
projects on social  
media.

New Products!  
Start time  
recording directly  
with the new  
cloud packages.

B2B darkmode!  
Now comfortable,  
order in the B2B  
webshop with a  
dark design.
