Brief description TIMESYS GmbH has been family-owned since 1983, has since developed into a modern, specialized manufacturer for the areas of workforce management and access control and stands for over 30 years of competence and experience in the HR sector. With the flexible and compatible software and hardware solutions of the TIMENSION system series, companies achieve greater efficiency and productivity. The company is ISO 9001 certified and has recently become a cooperation partner of the Zucchetti Group, developing and producing hardware and software systems for future-proof access control, sophisticated time recording systems and digital data collection.

2020.03 Short-time work allowance - what does it mean? Due to the current coronavirus epidemic, the regulations on short-time work benefits are being made easier. On March 8, 2020, the coalition committee decided to introduce a relaxation for a limited period until the end of 2020. This means that employers have the option of employing their employees less.

2020.06 She comes! - The electronic certificate of incapacity for work - and TIMESYS supports the practical implementation The AU is entering the new age: In the future, incapacity data can be called up directly from the health insurance company. This was legally decided in autumn last year. As a consulting company, TIMESYS supports the Bundestag committee in the practical implementation of time recording.

2020.08 Apprenticeship at TIMESYS - even during the Corona crisis! We face the crisis and offer two young people future opportunities for the time after the crisis, with dual training! In the area of office management and IT specialist application development, our training continues at a distance of 1.5 m.

2020.04 The new ruling sums up the duty to record time The time recording for employers applies from now on - and not only with the legal implementation of the EU directives! This is shown by a new ruling by the Emden Labor Court, which awarded the employee the right to his payment claim. For employers, this is an urgent wake-up call.

2020.05 Middle class helps Middle class- be there for one another in times of crisis! In our current work environment, we show why we can always take something positive with us from the crisis! As a medium-sized company, we are affected ourselves and know that our customers also strive for security and trust - that is why we have decided to maintain some services free of charge for regular customers during the crisis.

2020.12 Virtual time recording: simply book via the PC in the home office. Professional time recording is characterized by its flexibility and adaptability to external circumstances. In this way, the virtual time recording at TIMESYS is adapted to the circumstances of the home office within a very short time.

Your more With our tailor-made concepts, you will receive flexible, individual support and, **reliable** thanks to 100% compatibility with our systems, fully equipped. We analyze your **partner** customer-specific needs and create a perfect solution for you to organize your time recording, your personnel management and your access control for different locations, with country-specific requirements.

Workforce management & access control products Our design product line of the XFamily and SuperGLASS series impresses with its elegant and contemporary design. It has clear and simple operator guidance with individually programmable interfaces. We offer you high storage capacities and individual modules for identification at the terminal. In addition, with our industrial series and other accessories, you have optimal equipment for robust and demanding working conditions.

TIMENSION is the flexible software that saves costs and creates new potential through numerous, customer-specific functions - either acting on your company's own server or as a cloud version, with which you have access to your time management regardless of time and location.

The time recording via TIMENSION Cloud is your tool for all requirements of modern time recording - anytime and anywhere: whether on the go or in the office, on the construction site or on site at the customer. Try out the TIMENSION Cloud extensively for a week with our free test access.

**Corporate philosophy**

For more than 35 years we have understood every customer, their goals and processes. We develop solutions for all kinds of problems and take into account a variety of customer-specific requirements and restrictions. To this day we have always succeeded in making the impossible possible, and this is still our guiding principle today!
