

TIME RECORDING, PERSONNEL MANAGEMENT AND ACCESS CONTROL

TIMESYS GmbH has been family-owned since 1983 and has since developed into a modern, specialized manufacturer for workforce management and access control. With the flexible and compatible software and hardware solutions of the TIMENSION System series, companies achieve greater efficiency and productivity.

The company is certified according to ISO 9001 and is a recent cooperation partner of the Zucchetti Group. It develops and produces hardware and software systems for future-proof access control,

sophisticated time recording systems and digital data collection.

High-quality products and solutions from experts are required for your personnel management and security requirements.

From cloud solutions for small and medium-sized companies as well as craft businesses to professional software and hardware solutions for large companies and corporations: The requirements for personnel and security management and the integration into business processes are as diverse as people themselves.

YOUR ADVANTAGES OF TIME RECORDING

- Field staff can book their times, breaks, business trips, etc. via the mobile terminal
- View them in a time sheet
- Better clarity and planning security in the entire operational process
- A wage and salary interface can be integrated, which forwards the data directly for payroll accounting
- Employees can submit vacation requests digitally
- Also receive approval from an authorized person
- Depending on the individual processes in a company, software can be set up and optimized by means of appropriate interfaces and functions
- Software is always compliant with the law through updates
- Offers the required guarantee for documenting and retrieval capability during an inspection

PRODUCTS FOR TIME REGISTRATION AND ACCESS CONTROL

HARDWARE

Our new design series impresses with its super modern design and clear and simple user guide. Individually programmable interfaces and maximum reliability make our GLASS terminals the ideal module for your modern digital business.

Our industrial series has been specially designed to meet the needs of the most demanding environments. The terminals operate reliably under all conditions. They are easy to clean, intuitive to use and provide easy access for maintenance and service.

SOFTWARE

Great functionality and high flexibility combined - Our TIMENSION software is available both on your company's own server and in the cloud version. Despite its complexity, it is easy to use and can be customized to your needs.

CLOUD/MOBILE APPLICATION

Even without devices: Mobile and digital time recording via the TIMENSION Cloud is your tool for all the challenges of modern time recording, anytime, anywhere. With TIMENSION Cloud or TIMENSION App you can stay flexible.
